DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-5 and 11, in Paper No. 10 is acknowledged.
2. Claims 6-10 and 212 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-5 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 1 is confusing as to just what it is drawn to. In one instance it appears that the claim is drawn to "a hybridization probe," yet in an alternative embodiment it seems equally possible that the claim is drawn to "nucleotide derivatives" that are to be added to DNA and which are labeled. It also seems possible that the "hybridization probe" could also, somehow, comprise such nucleotide derivatives that are labeled.

Art Unit: 1634

6. For purposes of examination, the claim has been interpreted in its broadest sense, and that being it is drawn to any hybridization probe, and that the probe can have virtually any length and composition.

7. Claims 2-5 and 11 are similarly rejected as they fail to overcome this issue.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Stratagene.

10. Stratagene discloses random primers (probes) that are 9 nucleotides in length. Such a disclosure is considered to meet a limitation of claim 1.

11. Claims 1-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 62-244398 A.

12. JP 62-244398 A (English abstract) discloses the use of probes that comprise inosine residues and that some embodiments have labeled inosinic acid residues.
